

# G60 SERIES

## ELECTRONIC PRESET COUNTER

- 4 or 6 DIGITS (2 Line LED Display)
- POWER SUPPLY (AC100 ~ 240V)
- PRESCALE FUNCTION
- KEY PROTECT, MEMORY
- DECIMAL POINT POSITIONING
- DUST / SPLASH PROOF

G60 – 101

G60 – 111

### MODEL SELECTION

Models	Figures	Preset Level	Input		Prescale
G60 – 101	4	1	1 Input	Add / Subtract Input	—
G60 – 102			2 Input	90° Quadrature / Individual add, subtract Input	—
G60 – 111		2	1 Input	Add / Subtract Input	—
G60 – 112			2 Input	90° Quadrature / Individual add, subtract Input	—
G60 – 201	6	1	1 Input	Add / Subtract Input	—
G60 – 202			2 Input	90° Quadrature / Individual add, subtract Input	—
G60 – 203			1 Input	Add / Subtract Input	○
G60 – 204			2 Input	90° Quadrature / Individual add, subtract Input	○
G60 – 211		2	1 Input	Add / Subtract Input	—
G60 – 212			2 Input	90° Quadrature / Individual add, subtract Input	—
G60 – 213			1 Input	Add / Subtract Input	○
G60 – 214			2 Input	90° Quadrature / Individual add, subtract Input	○

### FRONT PANEL AND REAR TERMINALS

**1 Level Preset**  
G60-101, 102, 201,  
202, 203, 204

**2 Level Preset**  
G60-111, 112, 211,  
212, 213, 214

**Rear Terminals**  
Common to all models

ESC

Use this button to exit from the setting mode.  
(1 level preset only)

P<sub>1</sub> / P<sub>2</sub>

Use this button to enter and exit the setting mode for  
P<sub>1</sub> or P<sub>2</sub> from count mode. (2 level preset only)

SHIFT

Use this button to enter the setting mode from  
count mode.  
In setting mode, use this button to shift from each  
digit to edit or to change decimal point position.

▲

Increments the selected digit.

RESET

Use this button to reset the count value of  
the counter.

▼

Decrements the selected digit.

ENT

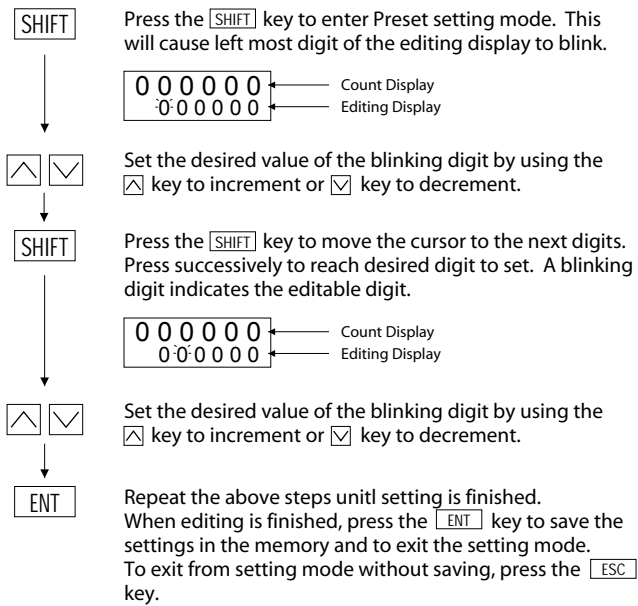

Use this button to save the settings made.

## OPERATIONS

In entering the setting mode to edit the preset values, prescale or decimal position, make sure that the key protect feature is disabled by unshorting terminals No. 9 and No. 10.

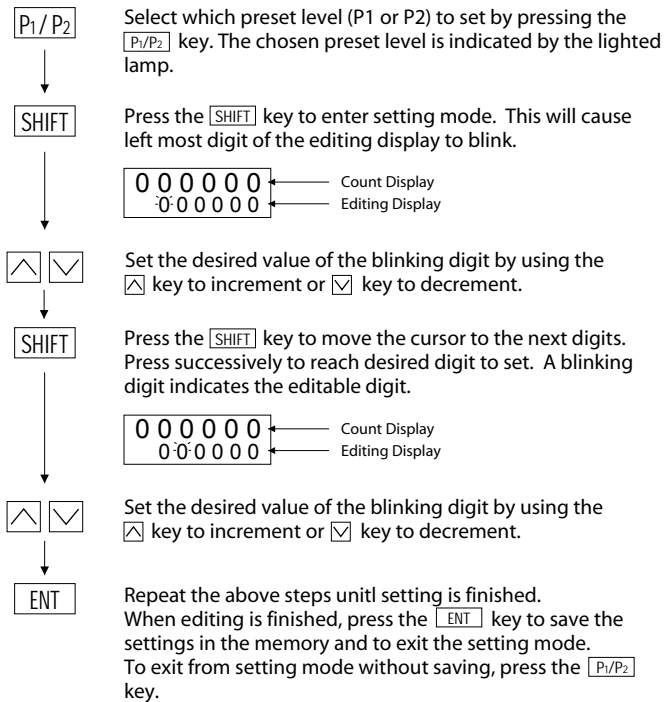

### A. Setting the Preset Value

#### <1 Level Preset>

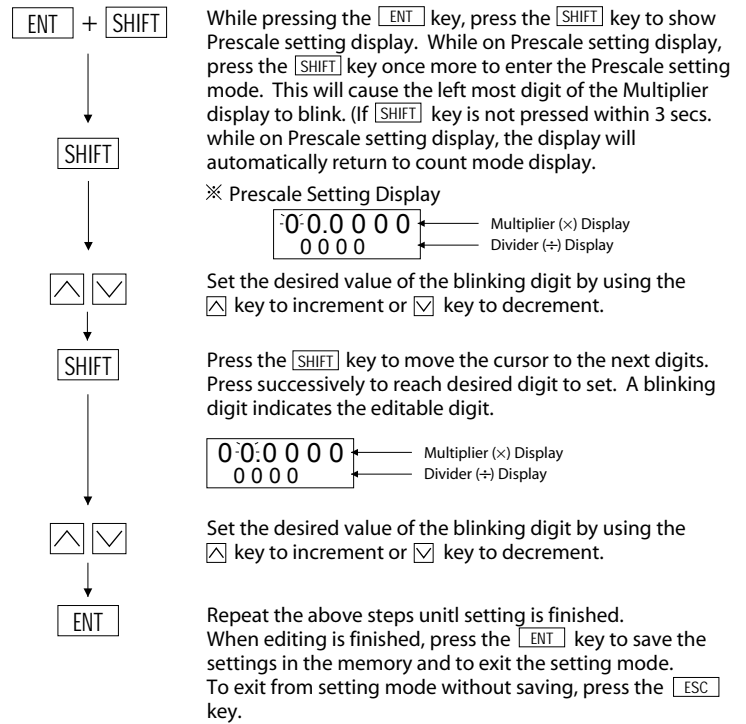

※ If “-” (minus) sign is desired, press the **▼** key, while the **SHIFT** key is pressed, while the left most digit of the editing display is set to “0”. The “-” character will be displayed. To remove the “-” (minus) sign, press the **▲** key while the **SHIFT** key is pressed.

#### <2 Level Preset>

※ If “-” (minus) sign is desired, press the **▼** key, while the **SHIFT** key is pressed, while the left most digit of the editing display is set to “0”. The “-” character will be displayed. To remove the “-” (minus) sign, press the **▲** key while the **SHIFT** key is pressed.

### B. Setting the Prescale

※ Explanation for the Prescale Formula

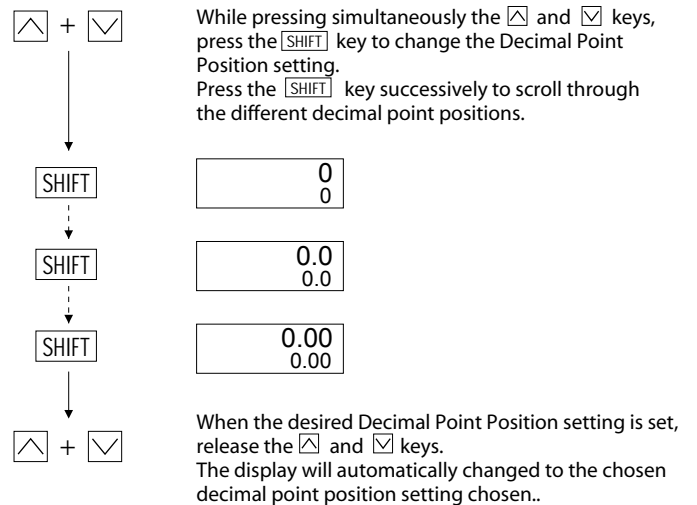

$$\text{Prescale Formula} = \frac{\text{Desired Display Value (per unit)}}{\text{Pulse Number (per unit)}}$$

← Multiplier  
← Divider

<Examples>

- To display 1 count per 10 pulses, set : Multiplier = 01.0000  
Divider = 0010
- To display 10 counts per 1 pulse, set : Multiplier = 10.0000  
Divider = 0001

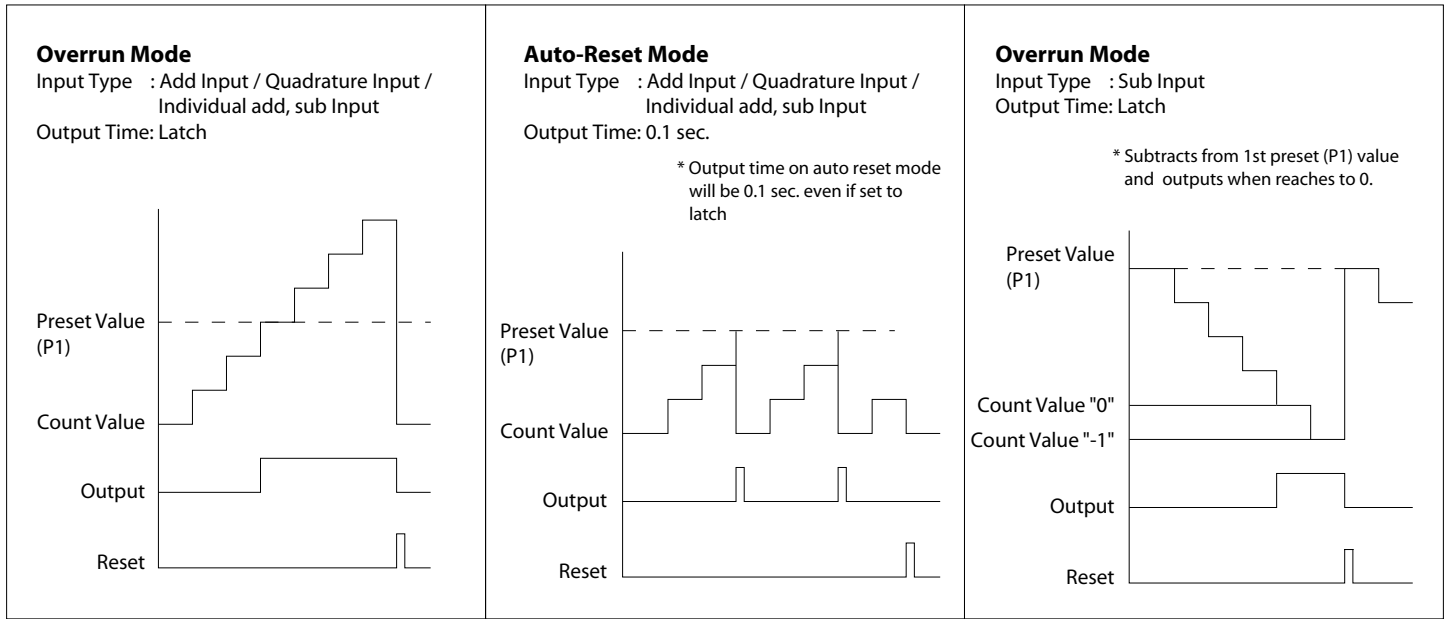

### C. Setting the Decimal Position

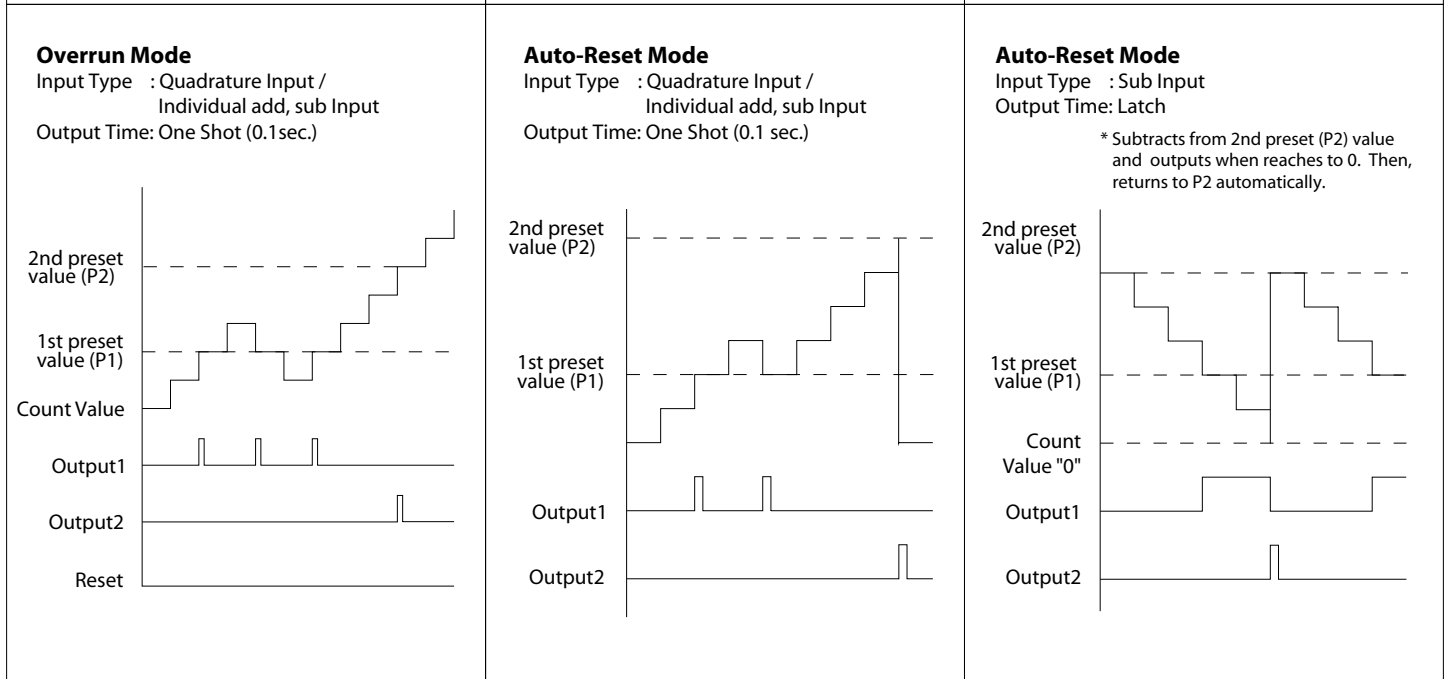

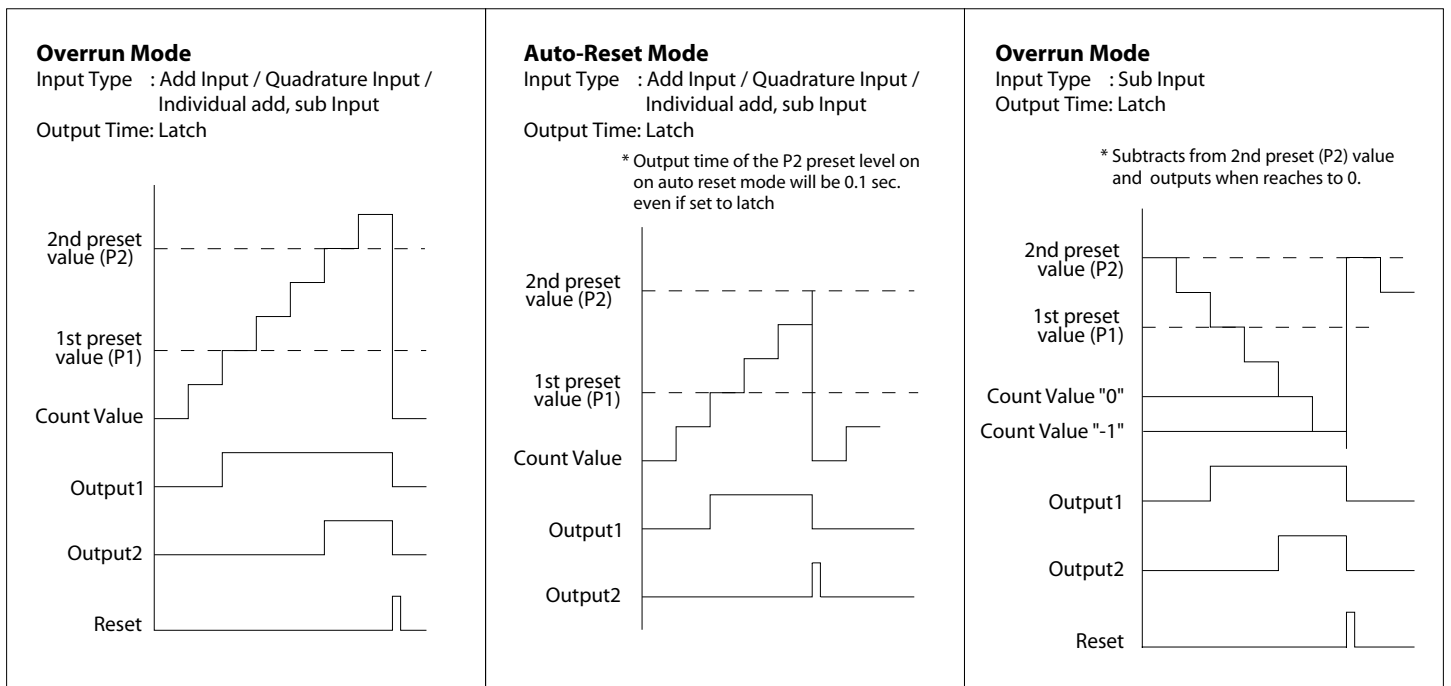

※ Changing the decimal point position while counting may cause changes in the count value and setting values of the counter. Please change settings when counter is not in operation.

# SAMPLE OPERATIONS

<b>Power Source</b>	Power Source  Supply power source AC85 ~ 264V to terminal No. 15, 16.			
<b>Input</b>	Add or Sub input (1 input only) G60 - 101, 111, 201 203, 211, 213	Select from Add Input or Sub Input by setting dip-switch No. 2. For Add Input, dip-switch No. 2 should be OFF. For Sub Input, dip-switch No. should be ON. * Setting of dip-switch should be done during power off.		
		Contact, add input  Input A GND	Contact, sub input  Input A GND	
		Non - contact, add input  Input A GND	Non - contact, sub input  Input A GND	
	Quad. / Individual add,sub. input (2 input) G60 - 102, 112, 202 204, 212, 214	Select from Quadrature or Individual Add/Sub by setting dip-switch No. 2. For Quadrature Input, dip-switch No. 2 should be OFF. For Individual Add/Sub Input, dip-switch No. 2 should be ON. * Setting of dip-switch should be done during power off.		
		Contact Input  Input A Input B GND	Non-contact Input  Input A Input B GND	90° Quadrature Input  Input A Input B 12VDC GND
<b>Output</b>	Open Collector output (Internal power supply is used.)  DC12V	Open Collector output (External power supply is used)  DC12 ~ 24V	Open Collector output (Internal power supply is used.)  DC12V	Open Collector output (External power supply is used)  DC12 ~ 24V
	Relay output  COM N.O.		Relay output  Output 1 Output 2 COM N.O. COM N.O.	
<b>Inhibition and Protection</b>		Input inhibition Key protection	: Pulses will not be counted while terminal nos. 6 and 9 are shorted. : Prescale, Preset Values, Decimal Point Position and Front Key Resetting will be disabled while terminal nos. 10 and 9 are shorted.	
<b>Reset</b>		Remote reset	: Resetting of the counter can be done remotely while terminal nos. 4 and 5 are shorted by a Relay, Microswitch. Counter remains reset while 4 and 5 are shorted.	

# DIP – SWITCH

## SPECIFICATIONS

Models	G60-101, 102, 201, 202, 203, 204	G60-111, 112, 211, 212, 213, 214
Preset Level	1 level	
Display	4 digit : Red LED    Count figures : 10.0 × 5.5mm    Editing figures : 8.0 × 4.0mm 6 digit : Red LED    Count figures : 8.0 × 4.0mm    Editing figures : 6.3 × 3.4mm	
Preset Range	4 digit : -999 ~ 0 ~ 9999    /    6 digit : -99999 ~ 0 ~ 999999	
Prescale	0.0001 ~ 100 (Multiplier : 0.0001 ~ 100, Divider : 1 ~ 1/9999)	
Input	1 input type : Add / Sub input (selectable by dip-switch) 2 input type : 90° Quadrature / Individual add, sub. input (selectable by dip-switch)	
Input Method	Non-contact input : Open collector    /    Contact input : Relay, Microswitch	
Count Speed	Non-contact input : 10 kHz (with Prescale: 6kHz max.)*    /    Contact input : 25 Hz maximum	
Pulse Width	Non-contact input : 50 μsec minimum.    /    Contact input : 20 msec minimum	
Make (Duty)	1:1	
Output Type	Contact output    : Relay Type 1A only (AC250V, 0.5A / DC30V, 2A maximum Load)    ※ for each output Non-contact output : NPN open collector (DC30V, 100mA maximum)	
Output Time	0.1 sec or latch. (However, in Auto-reset mode, output time will be 0.1 sec, even if set to latch).	
Output Delay	10kHz : 5msec maximum    6 kHz : 30msec maximum (with Prescale model)	
Reset	Front reset, Remote reset (50msec min.), Auto-reset	
Inhibition Function	When the Inhibition terminals are enabled, count input, preset editing, prescale editing and front reset are disabled.	
Preset Lamp	None	Turns on while each preset value are shown on the display.
Operation Mode	Overrun / Auto-reset	
Decimal Point Position	4 digit : 0 / 0.0 / 0.00    6 digit : 0 / 0.0 / 0.00 / 0.000 / 0.0000	
Output Lamp	Turns ON during output time	
Memory	E <sup>2</sup> PROM	
Power Source for Sensor	DC12V 100mA maximum	
Power Source	AC100 ~ 240V    -15%/+10%	
Power Consumption	Approximately 5VA	
Operating Temperature	-10 ~ 50°C (Non-freezing)	
Operating Humidity	45 ~ 85%RH (Non-condensing)	
Weight	Approximately 230g	Approximately 240g

\* If rotary encoder is used and prescale factor is not used at the counter, maximum count speed should be 10 kHz when the phase of quadrature is 90° ± 20° and 6kHz when that is 90° ± 45°.  
If prescale factor is used at the counter, maximum count speed should be 6kHz in any case.
